

Video Cokk Manual

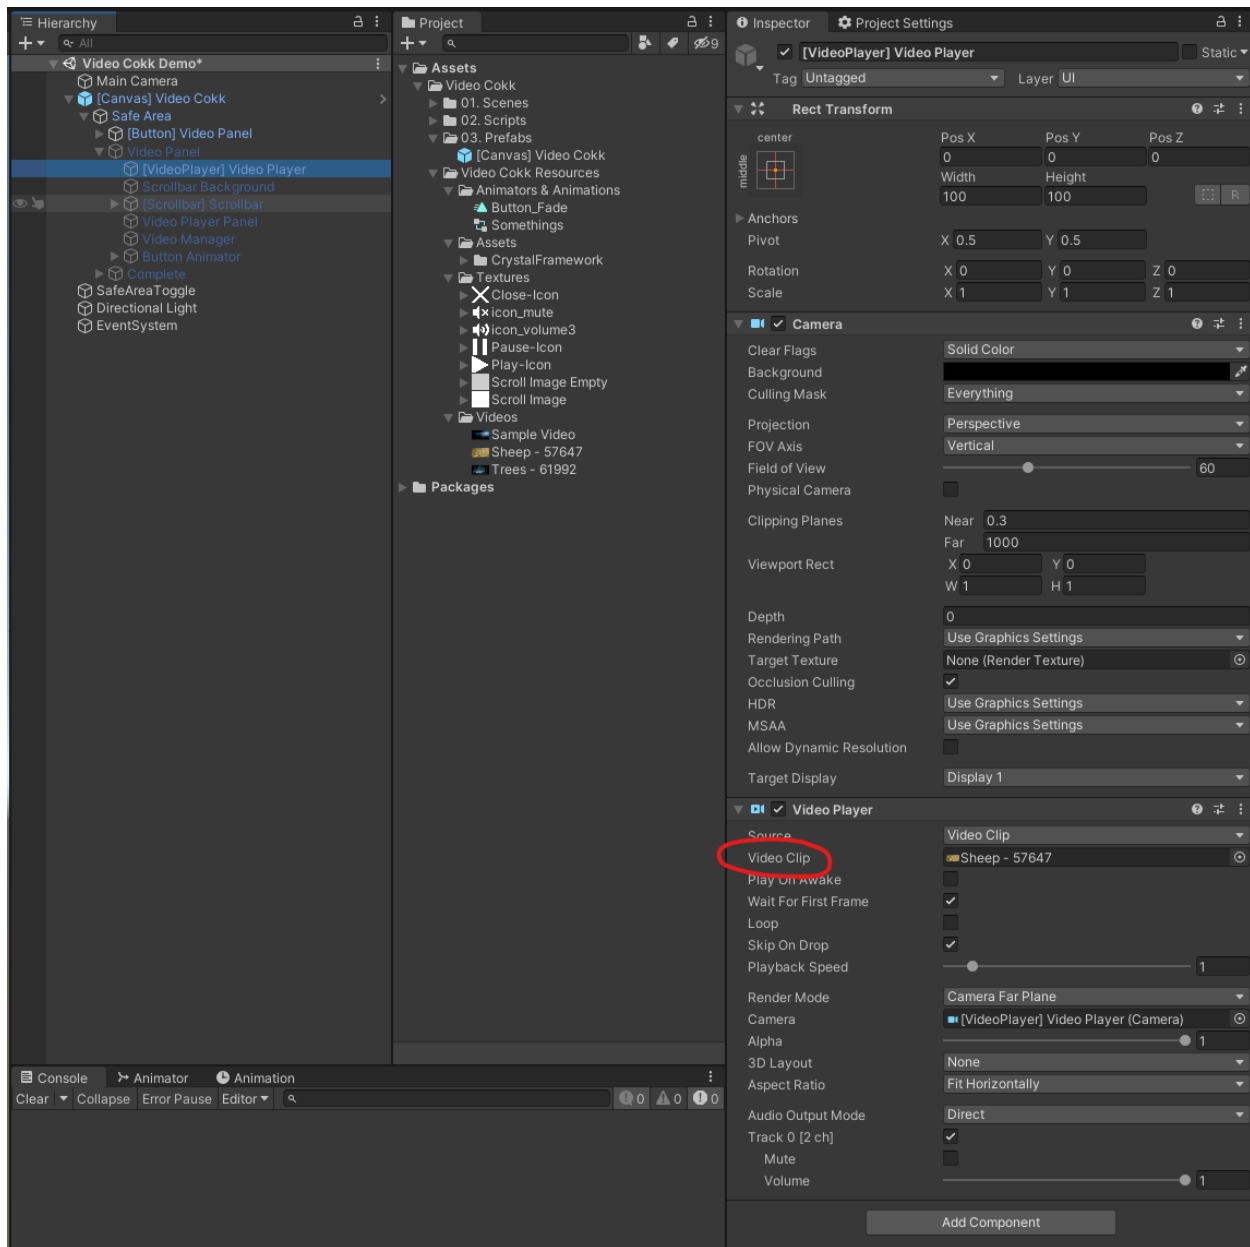

First, create a Canvas in the Assets/Video Cokk/03. Prefabs folder in Hierachy.

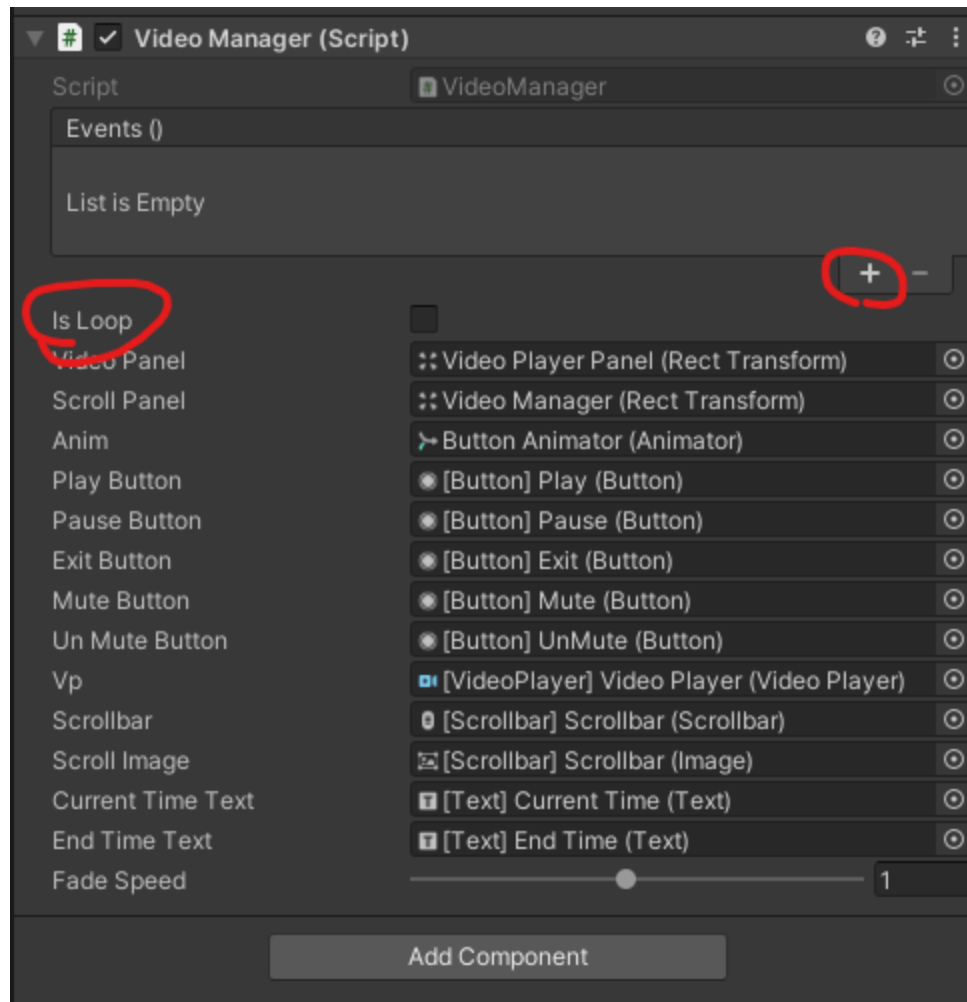

You can Control Video Player & Something Function
Here **VideoManager**

Just put the video clip you want in the video clip of the video player component.
Alternatively, you can enter the URL with the video you want.

You can Add Completed Event or Video Looping

Now, You can Play Video, as Easy

So you can play video just by putting Canvas Prefab in Hierarchy.

**If you have any questions about the Asset Utility Module,
Please let us know by email below. We will fix it in a short time.**
